

Tech Grad Challenge #6

We work with key partners around the world to identify risks, investigate, monitor and disrupt potential threats against Australians. For more than 70 years, ASIO has protected Australia and Australians from threats to their security.

Picross challenge

```

                1             1
                1             3 1 1
            1 1 1 1             1 1 1
            1 1 1 1             1 1 1
    5 1 5 1 1 1             5 1 1 1 3 1 1 1
    5 1 3 2 2 2 3 3 1 3 1 5 1 1 1
    
```

4 4 3														
1 1 1														
4 4 3														
1 1 1														
1 4 4 3														
1														
1 4 1 1														
1 1 1 1														
1 4 5														
1 1														
1 1 1 1 4														
1 1 1														
2 2 4														
3 1														
1 4														

Rules

- The numbers next to each row/column represent continuous blocks of coloured squares
- If a row/column contains more than one block, each block must be separated by at least one blank square
- Once completed, the contents of the grid will spell out one of ASIO's key partnerships

Hints

- The letters form a two-word answer
- Squares that form part of a letter do not touch squares of another letter vertically, horizontally or diagonally
